ACT

Full Time

Information & Communication Technology, Developers/Programmers

Terra Schwartz is an Australian company dedicated to building a better Australia. We are developing a world-class cyber-security software platform and supporting stack. Our platform defends client networks and systems by deterring, detecting, denying and delaying malicious threats.

We are seeking a software engineer to work in a team which is creating our world-class capability. Terra Schwartz Cyber provides intelligence-led, risk-based and mission-focused security services.

The Terra Schwartz team live the values of passion, honour and daring. Come and join us to change the way cyber-security is delivered in Australia!

Expectations:

- Ability to develop and manage software, in Python and JavaScript (React)
- Experience in developing applications in C++ language
- Ability to write advanced Python scripts
- Ability to design, implement and maintain APIs
- Develop new and innovative solutions for cyber security and intelligence capabilities
- A passion for software engineering, development and modelling
- Interest in information and cyber security (incl vulnerability testing) – no experience required, but a desire to learn
- Manage an array of technical information on threats such as indicators of compromise
- Develop detection algorithms and use cases
- Support the development of machine learning models
- Ability to lead, mentor and grow junior resources
- Ability to obtain and maintain AGSVA NV2 level clearance (at a minimum) - Australian citizenship is a requirement
- Work in a collaborative office environment in Canberra, ACT

Candidates will be assessed on the following criteria:

- Able to work in a small team and a collaborative environment
- Demonstrated technical expertise and experience
- Demonstrated experience in a similar role
- Minimum of 3 years software development/engineering
- Ability to work with and communicate with a diverse team
- Experience in agile and scrum would be an advantage
- Australian citizenship

The application form will include these questions:

- Which of the following statements best describes your right to work in Australia?
- How many years' experience do you have as a software developer?
- Do you hold Australian Security Clearance?
